Interview with Albert Ziegler about Gifted Education

Abstract
Prof. Albert Ziegler is the chair of Educational Psychology and Research on Excellence at the Friedrich Alexander University Erlangen-Nurnberg and one of the most productive and cited academicians in gifted education in Europe and also all over the world. Prof. Ziegler has contributed different theories about gifted education and education in general. One of his well-known theories is The Actiotope Model of Giftedness and the 7-Step-Cycle of Self-Regulated Learning. Since last year I had the chance to be with him and his colleagues in Germany, thus I decided to share with you the interview that we had about his theories and his recommendations for Turkey.

Keywords: actiotope model of giftedness, giftedness, gifted education
