Dear Academics and Readers

This issue included articles about multiple intelligent theory, teacher preferences of gifted students, new program model for academically gifted students, science activity for developing of gifted students’ empathy skills and creativity (If I Were Pascal, I'd do …), science activity about conic (I'm Discovering Conics and Designing Buildings with Conics), and interview with Dr. Breedlove about developing and implementing school for highly gifted students. We would like to thank to reviewers and authors for their support and contributions in publication of our journal.
